

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove started on a cross country RV expedition. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

Whilst on their trip, John spent time talking to previous business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a vast marketplace for a product that could swiftly and securely lift individuals in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John established a partnership with two friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty employees, they created and sold the first JLG aerial work platform. The company incorporates some of the basic design essentials of that original lift into existing models.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the business proudly continues to expand itself into many marketplaces globally and develops new products to make sure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
