The U.S. forklift division based in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the domestic lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a domestic machinery expansion project. Product sales of these goods were initially targeted to state-run corporations, large scale organizations, and the armed forces. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction became the new focus for enhancing quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of significant expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the very competitive North American materials handling industry. This joint-venture proved highly profitable for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished construction of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a global sales network and started exporting designs they had developed through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international marketplaces.
